Where does the material come from?

The materials in this document are made from manufacturers in Europe who have high eco credentials producing materials from state of the art, low emission, eco friendly factories. Every process has been thought through, from the use of recycling, to the wind turbine energy efficiency, recycled water cooling systems and planet friendly products. Some of the materials have been recycled, some are pristine, depending on the end product.

The cycle of sustainability from High tech factories, to production, use on site and using the correct materials on site to suit the project. Recycled, repurposed and re-used.

Stage 1.
High tech factories

High tech factories, manufacture to the highest ethical standards. Using sustainable energy, waste water treatment, Recycled water cooling systems and production. Recycling unwanted materials (sea waste made into water based coated printable fabrics, banners

Stage 2.
High tech printable materials

High tech printable materials, fabrics and films made for all applications, from walls and floors to glazing. Shipped to our factories and printed using ECO Inks. Materials (made from recycled materials, sea waste made into water based coated printable fabrics, banners

Stage 3.
Projects on site using printable materials and substrates

Printable materials, fabrics and films for walls, floors, glazing. Shipped in bulk to reduce emissions, to our factories, printed using ECO Inks. (Materials made from recycled materials, sea waste Fabrics, water based

Stage 4.
De-rig and breakdown on site. On site Recycle bins

Recycle cages placed on site by recycling company and removed to factory. Printed items, plastics and vinyls, fabrics placed into cages to be removed and taken to separation units. Items such as fabrics removed for repurposing. Items such as unwanted furniture and goods can be taken for charities to re-use (more information on request for these options)

Stage 5.
Recycling companies/separation units

Our separation units will sort all your waste. Then our recycling partners will get busy repurposing, reusing unwanted items you send them and making them into new materials and objects, with real sustainability. bags/fabric bags, helping local communities and charities at the same time. (more information on request for these options)

**The cycle of Sustainability,
at the heart of business.**

Easy up Fabric wrap

Black back, blackout fabric wrap

Permenant Vinyl

High quality Vinyl material, Permenant vinyl, high bonding, high durability. Ideal for graphics, such as exterior branding, interior graphics, boards. High-quality backdrops for the building wraps, wayfinding, signage, retail and construction sectors.

Recycle options

Recycling or re-purposed into equine surface, flooring

Substrates

Mounting and build materials, internal and external

Wayfinding and branding solutions

Foamex/Correx/NON PVC/PVC/Aluminium panels, MDF

Recycle options

Normal card recycle options/Crushed and recycled/repurposed

Removable Vinyl

Removable Vinyl

High quality Vinyl material, Removable matt white monomeric vinyl, 3 years durability. Ideal for graphics, such as Events, exhibitions, Brand activations, Retail, interior graphics, posters, boards, taxi sides. High-quality backdrops for the retail and event sectors.

Recycle options

Recycling or re-purposed into equine surface, flooring

Paper furniture/Display/ Plinths

Green credentials

Event Plinths, standees/ retail/Furniture/podiums and tables

Eco friendly eco range, made from recycled paper.

Transported flat packed

Easy to assemble, re-use multiple times and easy to pulp and recycle.

Re-use / Recycle

Where does the material go and how?

How can we help at the end of your projects life?

We work with charities who will re-home event and exhibition unwanted items. We support charities in the community, who work with local residents by training and support to make and create and design fabric creations. This means your building, fence branding and event wraps can be made into PVC bags/fabric bags, helping local communities. Our unique recycling networks can arrange pick-up unwanted waste from your site. Our partners will recycling unwanted materials into flooring, bedding, surfaces

Conclusion

Materials manufactured in eco friendly factories
Reduced bulk deliveries
Technical material advise
Mindful print and production
Effective sustainable Recycling and repurposing
Event recycle bins
Recycle collection
After event de-rig
Economically, ethical, viable end of use solutions
Waste consultancy

Thank you

All the materials in this document reusable and can be recycled.

We can offer end to end production and recycling.

BFG are working hard to ensure we offer sustainable alternatives and recycling.

If you don't see something that you require, please ask us and we will endeavour to answer your questions.

I hope you have seen something that inspires you to work with us.
